**Additional Information**

This program requires students to complete clinical education experiences at facilities both on and off the University campus and will require criminal background checks, Act 33/34 clearances and perhaps a drug screen prior to participation in clinical education. The results of these requirements may limit and potentially eliminate placement options for the student which can, in turn, result in an inability to meet graduation requirements. Additionally, conviction of a misdemeanor, felony, or felonious or illegal act may prevent the student from becoming credentialed and/or licensed to practice in the field.

Students are required to provide their own transportation to and from the off-campus clinical education sites. Please be advised that some clinical sites are not accessible by public transportation.
